

I am a graduate from Arizona State University with a Bachelor of Science and Master of Science in Industrial Engineering. In the summer of my academic career I interned at different companies such as Empire-CAT, Raytheon Missile Systems, and American Express. Currently, I am employed at Raytheon Missile Systems in their Rotational Engineering Leadership Program. This program provides me the ability to seek and obtain leadership positions within Raytheon after successful completion of the program. The program entails two, one-year rotations at different business units in different geographical locations throughout the United States. For my first rotation, I am an Industrial Engineer in Tucson, Arizona and my second rotation will most likely be in Massachusetts serving in another engineering role of my choosing. I became an active participant at Arizona State University's Grand Challenge Scholars Program and served on our Executive Board of the student organization, The Grand Challenge Scholars Alliance, where resources were provided for students in the program to successfully complete the program.
